

# Powder Management System

Boost your profile with automatic & efficient recycling of overspray

New "POWDER MANAGEMENT SYSTEM" is employed to automatically transport the recovered powder to the spray hopper after mixing with fresh powder, in any desired proportion

"POWDER MANAGEMENT SYSTEM" completely eliminates labour involved in exact mixing & thus reduces rejections. The heavy duty Sieving machine quickly & efficiently sieves the powder. The environmentally friendly process is carried out in a contamination free atmosphere without human intervention.

"POWDER MANAGEMENT SYSTEM" is an essential tool to maintain reduced in line powder inventory, establish good house keeping & boost profits.
